Goody
Woody

Wooden products, handcrafted with precision and passion, are not just objects, but real works of art that highlight the natural beauty of wood. However, our story is not just about products; every product we create represents a unique connection between art and practicality.

They are not only versatile in function, but also visually appealing, allowing them to blend seamlessly into any home, kitchen or restaurant decor. They offer practicality and aesthetic pleasure, as they are the result of constant effort in creating perfect wooden products.

Art is embedded in every wooden product, as no two creations are alike. Each journey from the tree block to the finished art product is a testament to the craftsman's skill and the unique character of the wood. In each piece of wood we discover charming grain patterns, rich colors and a harmonious blend of elegance and practicality.

Every wooden product, transcends its humble origins and becomes an extraordinary synthesis of the beauty of nature and human craftsmanship. This connection with art is not limited to specific products, but extends to all our wooden creations that become part of your everyday life.

Each product is not just an object; it is a story, a journey from tree to table. In each board or accessory for home and restaurant, you will discover a unique story that unfolds in your everyday life.

Instructions for care

All the charm and appeal of wood is lost if your piece of wood is warping or showing cracks. To avoid this, all it takes, is a little time and effort to read the instructions for care and your wooden product will look as new in no time.

1. All wooden products require appropriate protection – impregnation

With impregnation, we achieve, that wood remains beautiful and charming. It protects the wood against humidity, heat and everyday use. Do it immediately after the purchase. You may use all mineral oils which you can find in the stores or simply vegetable oils usually used in the kitchen.

2. Wooden products are not suitable for washing in a dishwasher

After use, do not put your wooden product into your dishwasher. Hot water and heat may severely damage the surface of your wooden product. Mild soap, warm water and soft cloth will suffice to clean the surface efficiently. It is advised, to oil the surface regularly. By doing this, you will prevent the surface from overdrying.

3. Heat is not the friend of your wooden piece

Our products are NOT to be used in any kind of oven (electric, gas, microwave, steam,...).

Also, do not expose wooden products to direct sunlight or other source of heat.

4. Like anything worth preserving, your wooden pieces need maintenance aswell

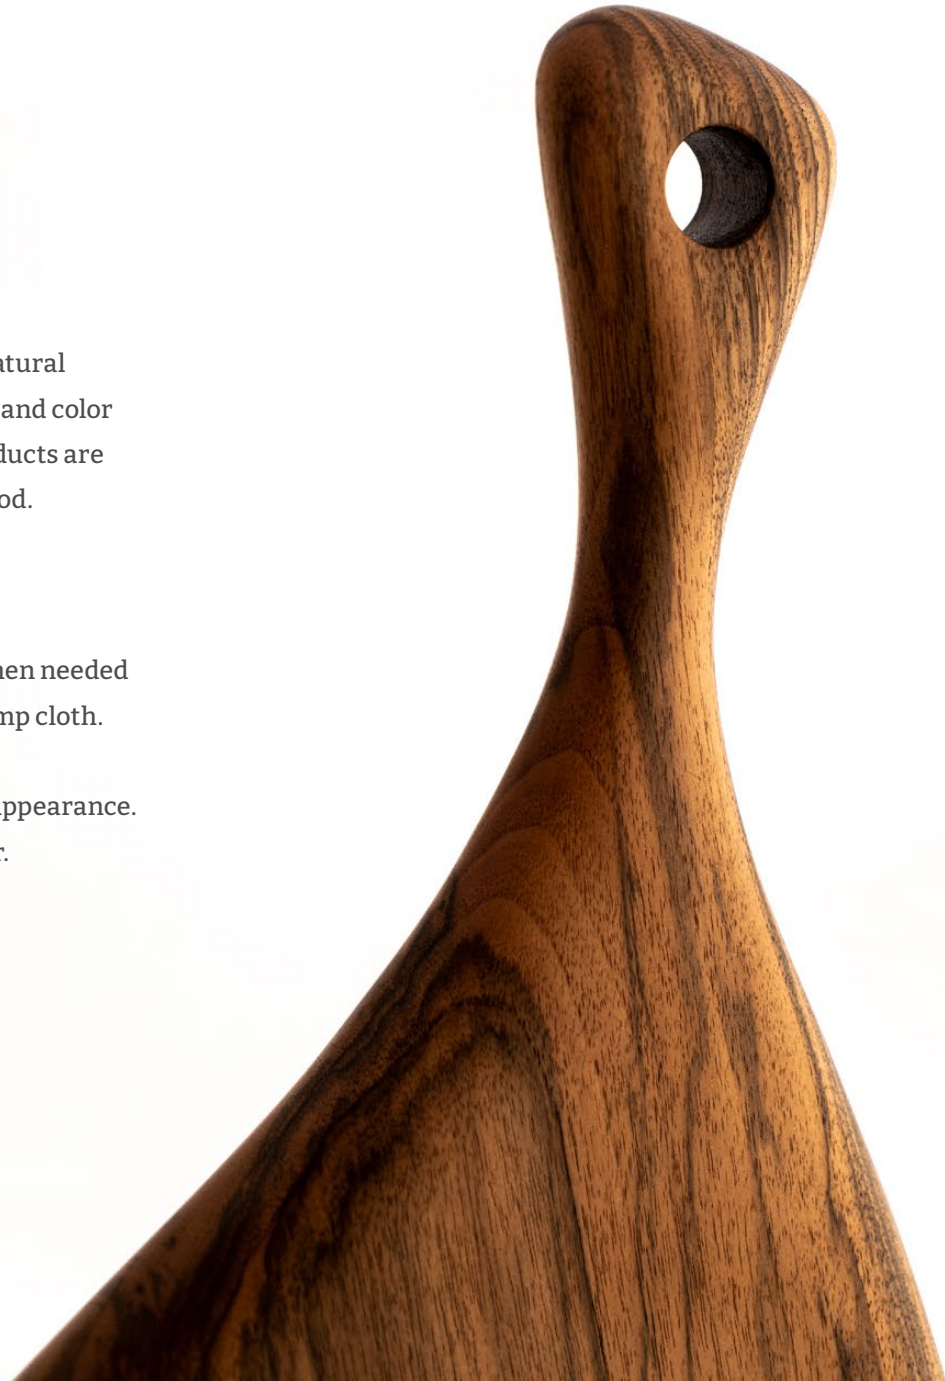

It depends on your attitude, how long will your wooden product remain attractive and useful. Often oiling, will definitely prolong its life. After time the wood may show cuts and bruises on the surface. You may improve the look of your product by using gentle sanding paper and a few drops of oil.

This is a natural product

Please note that all our products are made of natural materials and may vary slightly in size, pattern and color due to natural changes in the wood. All our products are completely safe and suitable for contact with food.

Instructions for use:

- Not dishwasher safe.
- Clean with mild soap and lukewarm water. When needed (harder stains), clean with lemon juice and damp cloth.
- Dry thoroughly.
- Apply wood care oil occasionally to maintain appearance.
- Do not allow wooden products to soak in water.
- Do not dry near the source of heat.
